NEPA Task Force Web Site Reports a New Feedback Entry:

Name: Julia Norton

Email Address: jnorton@carneiro.com

Comments: If the Endangered Species Act is any part of this, I beleive the ESA is overly protective of very small subsets of "species", highly adaptive to their particular mini-ecosytem. Also the ESA apparently does not differentiate between "E." species which have recently moved into an area vs those of long-standing duration. Therefore that Act needs to be modified for reasonable-ness. And this one does too.
